

CLAIMS:

1. Show case, in particular for displaying shoes (60, 70) or the like, in which horizontal shelf plates (2) as well as shelf plates (4) tilted from the rear toward the front are provided, said tilted shelf plates (4) being disposed each above a horizontal shelf plate (2) and supported by a horizontal pivot axis (40) located in the rear area of the show case and being upwardly tiltable around said pivot axis (40), said pivot axis being pins (40) inserted into holes (10, 12) in sidewalls (6) of the show case and wherein bearing boxes (30) receiving the pivots (40) are disposed on either side of the tilted shelf plates (4), wherein further the bearing boxes (30) are formed integrally with side walls (22) of the tilted shelf plates (4).

2. Show case as claimed in claim 1, wherein the sidewalls (22) are integrally formed with the topwall (20) of the tilted shelf plates (4).

3. Show case as claimed in claim 1 or 2, wherein the sidewall plates (6) comprise at least three rows (8, 10, 12) of holes for receiving pins (40, 46).

4. Show case as claimed in claims 1, wherein the horizontal shelf plates (2) are provided with slots (48) on either side (42) for receiving guide rails (44) fastened to the sidewall plates (6).

5. Show case as claimed in claim 4, wherein the guide rails (44) are fastened to the sidewall plates (6) by inserting pins (46) into selected holes (10, 12).

6. Show case as claimed in claim 4, wherein guide rails (44) of at least two different length are provided.

7. Show case as claimed in claim 1, wherein slots (50) are provided for receiving ledges (52) for retaining shoes (60, 70) on the tilted shelf plates (4).

8. Show case as claimed in claim 7, wherein the slots (50) are provided with U-profile strips (54) open to the upperside of the tilted shelf plates (4).

9. Show case as claimed in claim 8, wherein the sidewall (22) has recesses (29) open to the free end of the sidewalls (22)

10. Show case as claimed in claim 9, wherein the basis
5 (27) of the recesses (29) is aligned with the upper edge delimiting the leg (34) extending parallel to the tilted shelf plate (4).
